

**What's New:**

**XTime Elite**

**V2.18.10.0**

Workforce Management Solutions

Securing your time and resources

## CONTENTS

This document is an amalgamation of all the changes, additions and fixes that are made to the Standard XTime 900 system. New version changes are added at the end of the document. There is also an index for ease of use. Simply hold down the Ctrl Button on the keyboard and click the left mouse button over the item number you wish to see and you will be taken to that item in the document.

Information on versions prior to 2.18.07.0 is available on request

## IMPORTANT NOTES

---

**\*\* NB \*\***

**All versions prior to 2.17.01.0 are no longer supported as of 2018-04-01.**

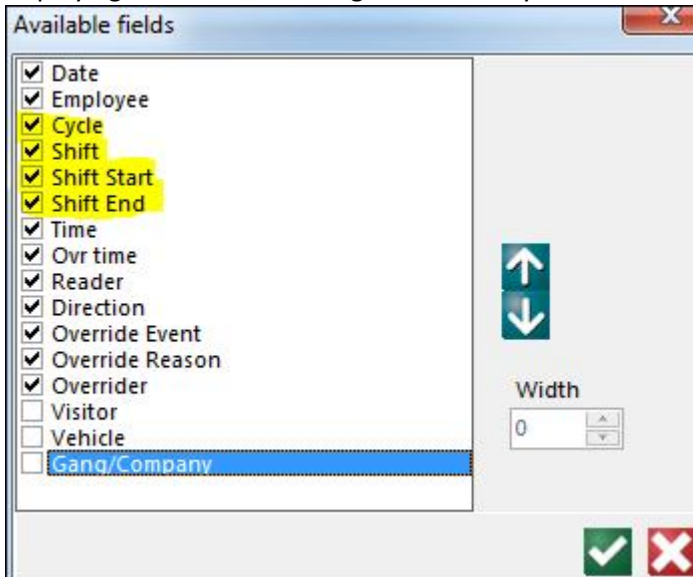

---

## V2.18.10.0

### NEW FEATURES

#### ➤ G4SDEV0000041 Columns added to the override report

The employee shift cycle and day in cycle have been added for selection to the editable layout of the report. This report has also been optimised as the query structure caused the report to run a week's data for 20 minutes before displaying the results on a large clock history table.

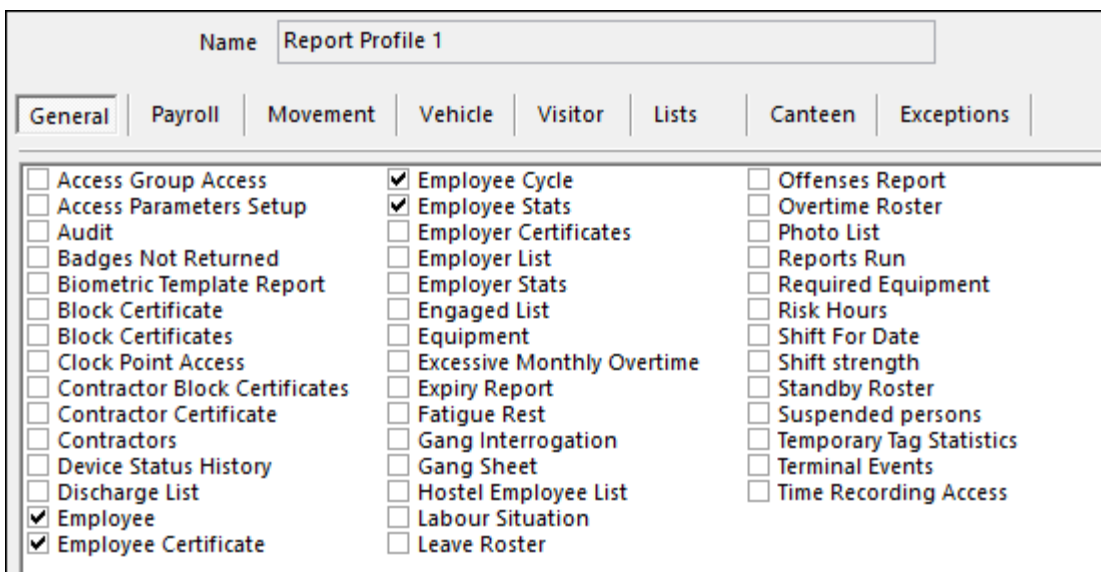

#### ➤ 56644:210486 User report profiles

It is not possible to specify reports that can be assigned to a user. With the addition of reporting profiles, users can now be restricted to specific reports when linked to a profile. There is a new menu item named **“Report Profiles”** under the **“Users”** main menu:

The screen consists of a profile name as well as a listing of all reports. This is where the profiles are set that can be linked to the user:

Once the profiles have been configured, they can be linked to users on the User Maintenance configuration screen:

User Id	Report profile 1
Administrator	<input type="checkbox"/>
Restrictions	None
	<input type="checkbox"/> Also Clone Dept/Gangs
Expires	<input type="checkbox"/>
Employee	
Use report profile	<input checked="" type="checkbox"/> Report Profile 1

When the user logs in only those reports will be visible:

XtElite Version:	2.18.10.0
License Expiry:	2018-12-31
Registration Code:	29134-32574-87488-12194-01885-56504
Current User:	Report profile 1

- Common Reports
  - Lists
    - Discharge List
    - Employer List
    - Engaged List
    - Parade List
  - Contractor Reports
    - Movement Reports
      - Movement
    - Payroll Reports
      - Pay Report
      - Time Invoice

➤ **56582:210447 At Work and At Work Detail Reports**

Added employee enhanced search

## At Work

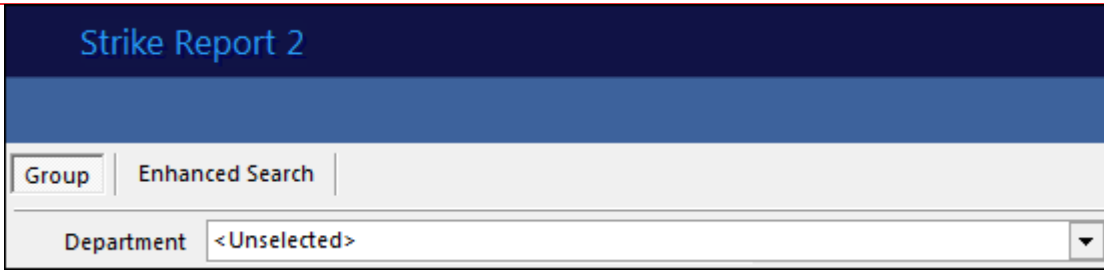

Group: Enhanced Search

Department	Gang	Employees : 1 Selected : 1
<input checked="" type="checkbox"/> Default	<input checked="" type="checkbox"/> Default	<input checked="" type="checkbox"/> E03 - BOND, JAMES
<input type="checkbox"/> Human Capital		

Printer: \\sbylps01\BYL-Development

➤ **56582:210447 New Movement Report: Strike 2**

This is a copy of the At Work Detail report that has been renamed to Strike 2 and placed under the Movement Reports. The Enhanced employee search has been added as well.

➤ **56006:208787 Furnace zone occupancy**

New feature whereby we receive an input from a 3<sup>rd</sup> party system and if a preconfigured zone is empty, the reader is locked and a reply sent back to the 3<sup>rd</sup> party as confirmation.

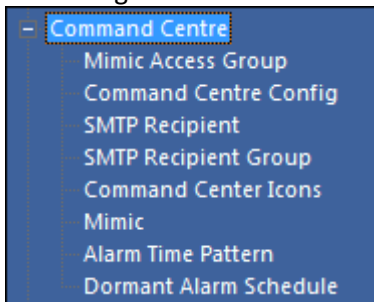

Refer to the Zone occupancy work instruction for full details.

## 2.18.09.1

### NEW FEATURES

➤ **52408:202268 Command Centre setup enhancements**

The configuration of the command centre has been refined and enhanced to make it easier and more user friendly.

## 2.18.09.0

### EXCEPTIONS

➤ **53860:203095 Sage export leave days fix**

There was an exception when calculating the leave days on the export.

## 2.18.08.3

### NEW FEATURES

➤ **G4SDEV00000025 Canteen printer attached**

When using a printer for meal tickets, the tickets would not always be printed on an accepted clocking. This has been rectified by adding a parameter to the terminal to which the printer is connected. When the function is set to "Canteen", a parameter named "Printer attached" will display for selection on the parameters tab.

## 2.18.08.2

### EXCEPTIONS

➤ **55883:208233 Remote override login**

When using the remote override with a password, the secure password feature was not reading the login details correctly causing the login to fail.

## 2.18.08.1

### NEW FEATURES

#### ➤ 53860:203095 Pay Export additions

Additional settings added to the payrule on the Minimum | Standby tab:

Export days	<input type="text" value="0.0000"/>
Standby Allowance	<Unselected>
Auto Standby Days	<input type="text" value="0"/>
Auto Stby Allow	<Unselected>
Additional Stby Days	<input type="text" value="0"/>
Additional Stby Allow	<Unselected>
Partial Leave	<input type="checkbox"/> ( Set as work day )
Callout travel allowance	<input checked="" type="radio"/> Disabled <input type="radio"/> Optional <input type="radio"/> Compulsory

Parameter	Details
<b>Export days</b>	This is a preset number of working days for all pay months. Example: 21.667. This is only applicable to the Sage People Export set on the Pay Category
<b>Standby Allowance</b>	The Standby allowance that will be applied to each employee on this Pay rule, for the period that they are on Standby
<b>Auto Standby Days</b>	If an employee was not on Standby, the hours that they worked outside shift time are calculated as Overtime. Therefore when the supervisor changes the Overtime to "Call-out not on Standby" on Web Exceptions, the employee will automatically be put on standby for the days specified.
<b>Auto Stby Allow</b>	This is the allowance that will be used for the standby period that was automatically assigned due to the change of the time code from Overtime to "Call-out not on Standby"
<b>Additional Stby Days</b>	If a different allowance is to be used after the auto standby allowance number of days setting above, it is set here for number of days and the allowance is set below
<b>Additional Stby Allow</b>	As detailed above
<b>Partial Leave</b>	Only applicable to the Sage People and Sage Notepad export types.
<b>Callout travel allowance</b>	Used to set the priority of the callout allowance for Web exceptions per payrule. "Disabled" by default. "Optional": users will be given an option to select an allowance per callout. "Compulsory": users will be required to select an allowance for each callout.

## 2.18.08.0

### NEW FEATURES

#### ➤ 55886:208237 Weighbridge Dashboard

An additional terminal type (Unit type) has been added to the drop down list. This is the Target UHF unit type used for the long range readers on a Weighbridge. The terminal screen has a new tab that is only displayed when this unit type is selected. The tabs name is Weighbridge settings and is used to link the target to its host EABR or to the weighbridge PC running a weighbridge intf service.

Main	<b>Weighbridge Settings</b>
Controller By	<input checked="" type="radio"/> Controller <input type="radio"/> Weighbridge Service
Parent Terminal	<Unselected>

The weighbridge dashboard uses these settings to communicate with the target readers.

## EXCEPTIONS

### ➤ 56045:208722 Detail Clock Card shift allow as hours fix

The report was using the previously run reports figures for the current report.

### ➤ 53860:203095 Pay Export expansion

Two additional Export types have been added. Sage People and Sage Notepad

Export Type	<Unselected>
Export name	Palpay Monthly extract Paywell Paywell monthly <b>Sage Notepad</b> <b>Sage People</b> SAP Clocks SAP Time SAP Time Date Selection

## 2.18.07.5

## NEW FEATURES

### ➤ 55883:208233 Weighbridge Adhoc vehicle

An expansion on the weighbridge module to include a visitor as a driver and to remove vehicle access after a route is complete.

General	Access Groups	Certificates	Parades
Current zone <input type="text" value="Off Site"/>			
Ignore APB <input type="checkbox"/> (Anti-passback)			
Clock w/o Fingerprint <input type="checkbox"/>			
Inherit Required Equipment <input type="checkbox"/>			
<b>Visitor is a Truck Driver</b> <input checked="" type="checkbox"/>			
Suspended <input type="checkbox"/>			

There is also no validation done on the route steps if the following parameter is set on the Main part of the vehicle class.

Name	<input type="text" value="ADHOC"/>
Code	<input type="text" value="A01"/>
Is Main	<input checked="" type="checkbox"/>
Requires Main	<input type="checkbox"/>
Driver Mandatory	<input type="checkbox"/>
Main Mandatory	<input type="checkbox"/>
<b>No Route Validation</b>	<input checked="" type="checkbox"/>
Main Dependent Count	<input type="text" value="0"/>

## 2.18.07.4

## NEW FEATURES

### ➤ 54926:205788 Add CC sysparam for SSL

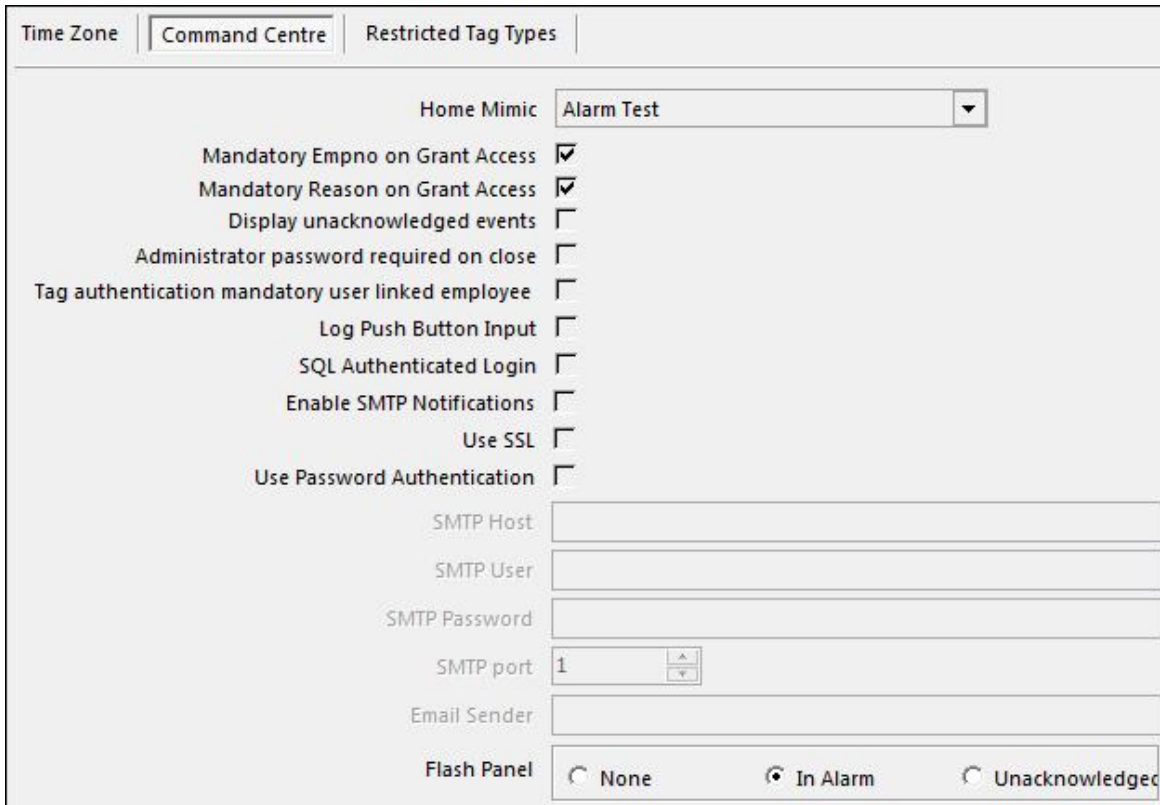

A new parameter added to cater for email setup using SSL on the **SYSTEM PARAMETERS | SYSTEM | COMMAND CENTRE** tab

Use SSL

### ➤ 52408:202268 Command Centre configuration screens

A new setup screen has been added with enhanced command centre parameters under **SYSTEM PARAMETERS | SYSTEM | COMMAND CENTRE**. Refer to the command centre manual for details of these settings. Please note that the command centre is an additional module and will incur costs for activation.

## 2.18.07.31

### ➤ G4SDEVE00000011: Report distribution Excel exceptions

There was an issue with closing existing instances of excel running when the reports were being created and sent. We now create an instance for the reports and then close it when complete.

## 2.18.07.3

### ➤ G4SDEVE00000011: Excel exceptions

Report distribution save copy of excel instead of save as

## 2.18.07.2

### ➤ G4SDEVE00000011: Report distribution additions

A new exe created to handle the report creation called XTAuto which is part of the upgrade exe

## 2.18.07.1

### NEW FEATURES

#### ➤ G4SDEVE00000011: Automated Report distribution

Reports can be scheduled and sent to a preconfigured email address or distribution list. Note that this is a new module and incurs a cost for activation. Currently there are only 4 reports available for selection.

- Shift Clear All
- Evacuation Report
- At Work

- Zone Clear

Refer to the Report Automation manual for detailed information.
